

[SALES COPY – INDIEGROW]

**ATTENTION: City Dwellers
Who Want to Live Better!**

Grow Your Own Food Without Gardening!

If, when you hear the word “gardening,” you think of back-breaking, dirty, sweaty work – then this is NOT “gardening”!

This is **IndieGrow** – a totally modern reinvention of traditional *unattractive* “gardening.”

With IndieGrow, you get a simplified, modular growing system that makes it a SNAP to raise your own healthy, nutritious fruits and vegetables, as well as herbs and you name it!

You’ll save money. AND it’s eco-friendly, too!

You’ll enjoy a healthier diet and a better environment with your very own IndieGrow!

The perfect *compact size* fits any small space you have available. It’s even ideal for rooftop or terrace gardens!

Anywhere you’ve got a few square feet, you can start an IndieGrow farm!

The convenience of wheeled mobility is also a BIG plus. Each unit can be easily moved around for getting maximum advantage out of sun, shade, wind – as well as for ease of harvesting.

IndieGrow is a patent-pending independent/modular growing system that is designed for soil, hydroponics, and aeroponics.

Best of all...

IndieGrow takes all the “hassle” out of traditional gardening, and brings it down to a level *anyone* can live with. Even if you’ve never tried growing anything before in your life, the IndieGrow will make an expert out of you!

You’ll be able to enjoy the delicious, satisfying taste of your own vegetables and fruits for delectable salads, snacks, or desserts! And knowing that *you* raised them yourself makes them so much better!

You’ll soon enjoy gardening like a habitual gambler loves poker!

Only in a much *healthier* way, of course...

[Click here](#) to download detailed information about the IndieGrow and how it can become part of your *ideal* lifestyle!
